

## Attend to the Unintended

At Logic Hazard Labs, we offer solutions that help you identify and mitigate key areas of technology risk. We specialize in delivering technical assessments of products and integrated systems, surfacing issues that arise as complexity increases. We support your security program by providing hard data, not generic talking points.

## Product Offerings

Product Name	Description	Key Features	Benefits
System Penetration Testing	Human driven assessments, focused and customized to your technology	Practical exploitation, Contextualized risk, Independence	Identifies risks that automated testing alone cannot find
Enterprise Penetration Testing	Testing your most important systems-of-systems - the whole enterprise	Targets the enterprises's full surface area	Tests both technology and processes to identify exploitable gaps
Basic Wireless Assessment	WiFi site survey to identify known weaknesses or client misconfigurations	Identifies enterprise WiFi interactions	Assesses the risk from local or "nearest neighbor" <sup>1</sup> attackers
Advanced Wireless Assessment	Attempts to enumerate and identify additional forms of wireless communication, including Bluetooth Low Energy or proprietary RF communications	Customizable based on needs	Identifies attack surface area that is often under-reported or completely unknown

Product Name	Description	Key Features	Benefits
Threat Modeling	A “whiteboard pentest” that examines system elements and data flows for potential weaknesses	Focuses on a system’s assets and data flows to assess risk during the design phase	“Shift left” security activities assist in planning controls while they are easier and cheaper to implement
Configuration Review	High-level security gap assessment for a specific technology or platform	Comparison to applicable benchmarks or standards	Rapid assessment identifies “low-hanging fruit”
Security Advisory	Tailored professional services, providing expertise on the topics most relevant to you	Can cover high-level overview to technical deep-dive	Flexible services can adjust along with your priorities
Training	From Security Awareness Training to technical skills, up-skill your staff with interactive training	Instructor delivered	Invest in your team by internalizing the skillsets you need
